

ALABASTRO

AD LUCEM

Iluminação em Pedra de Alabastro

O que é Alabastro?

O Alabastro é uma pedra natural muito valorizada devido à sua textura, veias interiores aleatórias e sobretudo, pela suas propriedades translúcidas.

O Alabastro é extraído em pedreiras a céu aberto, em blocos de rochas que emergem à superfície ou estão completamente enterradas.

As pedras são depois cortadas, polidas e talhadas manualmente, esculpindo assim formas e conceitos de iluminação e decoração.

Cada peça de alabastro é única e irrepetível, na medida em que resulta de uma pedra com texturas e veias singulares e de um trabalho profundamente artesanal.

O efeito translúcido, característico da Pedra de Alabastro, proporciona uma iluminação suave, criando uma atmosfera exclusiva e uma ambiente acolhedor.
